

The diagram illustrates the layout of a CR80 ID / PVC card. It features a central white rectangular area. This area is enclosed by a solid red border, which represents the trim. Within the white area, there is a dashed blue border representing the safe area. The entire white area is surrounded by a grey border, which represents the bleed. The card is shown within a larger grey frame, which is itself surrounded by a dashed blue border. The text at the bottom of the diagram provides the dimensions and the meaning of the colors and lines used.

CR80 ID / PVC card 3.375" x 2.125" | red = trim blue = safe area grey = bleed | oddjobsr
